- The plants listed are in limited supply, some very limited. Orders will be filled on a first to order premise.
- Prices are AUD and are subject to change without notice
- All descriptions are printed as a guide only and no responsibility is taken if they are not met
- We reserve the right to withdraw or limit the sales of plants listed
- Although we provide excellent care to our plants, no warranty is given
- This catalogue cancels all released previously
- Payment can be made by direct deposit, Pay Pal (3% surcharge) or cash on pick up. Prices do not include freight. We no longer accept money orders via Australia Post or any private service, as the process is time consuming and limited nor do we accept personal cheques.
- Orders will be posted on Monday or Tuesday via the Australia Post service of your choice. **Unfortunately, we cannot post live plants to Tasmania, WA or overseas at this point in time unless you have ways to organise quarantine and some restrictions may apply to the NT also.**
- We can bring your order with us to a local society meeting, shows and fairs we attend or you may arrange to visit the nursery and collect them
- No responsibility will be taken or warranty given to orders delivered via any postage service, once the order leaves our care its delivery or quality is no longer in our control.
- The pictures seen throughout this catalogue serve as a guide only, we cannot be held responsible if the plants do not flower in accordance with these photos and any photos are to be used as a guide only.

Everything in this listing has been reduced

Prices expire on the 1st of March 2020

Dendrobium Section Rhizobium Hybrids & Species

F40 *D. Waverley Delight* x *D. teretifolium* 'Shane'

D. Waverly Delight has wonderful shape and is of burnt orange and sunset tones. *D. teretifolium* 'Shane' is a fine example of the species with its cream flowers, larger than normal. Hopefully these flower with lots of colour and lots of large flowers.

Available in 50mm @ \$7

G43 *D. Tweetas* 'Neville' x *D. Martin* 'Gold' HCC/AOC

This is one cross I personally have very high hopes for. *D. Tweetas* 'Neville' has excellent shape and colour, paired here with the 'beefy' *D. Martin* 'Gold'. We are looking for colourful yellows and oranges with outstanding shape. There's no experimentation with this cross, just on a hunt for award quality progeny.

Available in 50mm @ \$7

2977 *D. Australian Ginger* 'Wow' HCC/ANOS-AOC AD/AOC x *D. Kalon Byrne-Dimos* 'Newbold'

Again, large and colourful flowers are expected. However, we are hoping to maintain the quality shape and proportioned nature of the clear yellow 'Newbold'. The ginger used in this cross might not have the best shape of the grex, but what it does have is colour.

Available in 50mm @ \$7

2978 *D. Tweetas* 'Curly Gold' x *D. Wickersham* 'Genesis'

The next generation of yellow hybrids here, looking for purple tones in the labellum and full shape. We used 'Curly Gold' because of its floriferousness and also compact growth habit. 'Genesis' is of course the product of *D. Lauren* 'Holly Chief' AM/AOC

Available in 50mm @ \$7

		<p>2989 <i>D. Harmon</i> 'Mark' x <i>D. Hot Coals</i></p> <p>Our mushroom pinkish-brown Harmon is a relatively large <i>Dendrobium</i>, its white striations and its 30mm plus wide bloom really stand out in spring. It's a very compact plant and its inflorescences are completely upright. We used <i>D. Hot Coals</i> to hopefully inject a fair amount of its brown and red colouration, just for something a bit different.</p> <p>Available in 50mm @ \$7</p>
		<p>3011 <i>D. Tweetie</i> 'Huge' x <i>D. Australian Ginger</i> 'Big Guy'</p> <p>Searching for big and colourful flowers similar to <i>D. Tweetas</i>, however this time with an extra dose of <i>D. fuliginosum</i>. 'Big Guy' is our largest ginger and has an awesome ruffled labellum. These should be good.</p> <p>Available in 50mm @ \$7</p>
		<p>3012 <i>D. Tweetie</i> 'Pie' x <i>D. Martin</i> 'Gold' HCC/AOC</p> <p>The 'beefy' <i>D. Martin</i> 'Gold' has very good shape and it also has an interesting mix of green and gold tones. Here we have match him with 'Pie' to try and achieve a different colouration. Also, by using <i>D. Tweetie</i> there is a chance we will get more than one flowering a year. These should be plants for the show bench.</p> <p>Available in 50mm @ \$7</p>
		<p>3013 <i>D. Sharday</i> = <i>D. chordiforme</i> 'Tumbi' x <i>D. Tweetie</i> 'Pie'</p> <p>The reason I made this cross was to begin a line of breeding, a line of compact plants that flower in the later months of the year, this way we have section rhizobium hybrids in flower all year round. We expect quality shape and colours ranging from yellow to red.</p> <p>Available in 50mm @ \$7</p>
		<p>3015 <i>D. Martin</i> 'Gold' HCC/AOC x <i>D. Tweetie</i> 'Pie'</p> <p>A reverse of the above 3012, grab one of each and see which has the most colour!</p> <p>Available in 50mm @ \$7</p>
		<p>3016 <i>D. Sharday</i> = <i>D. Tweetie</i> 'Huge' x <i>D. chordiforme</i> 'Tumbi'</p> <p>The same description applies from 3013, however this time we have used 'Huge'.</p> <p>Available in 50mm @ \$7</p>
		<p>3156 <i>D. Harmon</i> 'Mark' x <i>D. striolatum</i> 'Neville' HCC/ANOS</p> <p>Our mushroom pinkish-brown Harmon is a relatively large <i>Dendrobium</i>, its white striations and its 30mm plus wide bloom really stand out in spring. It's a very compact plant and its inflorescences are completely upright. I thought it would be good to introduce <i>D. striolatum</i> to increase floriferousness, create compact bushy plants and increase our percentage of pinks or maybe even greys.</p> <p>Available in 50mm @ \$7</p>

		<p>3125 <i>D. Rocky Carroll</i> x <i>D. Australian Sunblessed</i></p> <p>Here we have used <i>D. Rocky Carroll</i> with one of our dark <i>D. Australian Sunblessed</i>. We are hoping for large, open and dark flowers. Carroll is luckily nice and compact, continuing with the main theme of our breeding program.</p> <p>Available in 50mm @ \$7</p>
		<p>3154 <i>D. Lauren 'Holly Chief' AM/AOC</i> x <i>D. Martin 'Gold' HCC/AOC</i></p> <p>There is no doubt that we are searching for large, shapely, floriferous golds and yellows here. Two of our awarded show winners paired together, these should be outstanding.</p> <p>Available in 50mm @ \$7</p>
		<p>3131 <i>D. Martin 'Gold' HCC/AOC</i> x <i>D. Tamara 'JD Spots'</i></p> <p>The 'beefy' <i>D. Martin 'Gold'</i> has very good shape and it also has an interesting mix of green and gold tones. So, we've paired him with our favourite <i>D. Tamara</i> to add some spotting and improve his labellum and overall shape.</p> <p>Available in 50mm @ \$7</p>
		<p>3121 <i>D. teretifolium var. aureum 'Gigantor' HCC/AOC</i> x <i>D. Tweetas 'Cork Gold'</i></p> <p>We love 'Cork Gold' but it is a slightly smaller flower with a lighter count. So, we have added 'Gigantor' to the mix with its massive blooms and an average of 9 flowers per inflorescence. We have also learnt that 'Gigantor' intensifies colour, with our cross <i>D. Hunter Legend</i>.</p> <p>Available in 50mm @ \$7</p>
		<p>3151 <i>D. Martin 'Royal' x D. Tamara 'JD Spots'</i></p> <p>On the search for spots here. Both parents are large and shapely flowers on compact plants.</p> <p>Available in 50mm @ \$7</p>
		<p>3155 <i>D. Harmon 'Mark' x D. striolatum 'Ruffles' FCC/AOC</i></p> <p>Our mushroom pinkish-brown Harmon is a relatively large <i>Dendrobium</i>, its white striations and its 30mm plus wide bloom really stand out in spring. It's a very compact plant and its inflorescences are completely upright. I thought it would be good to introduce <i>D. striolatum</i> to increase floriferousness, create compact bushy plants and increase our percentage of pinks or maybe even greys.</p> <p>Available in 50mm @ \$7</p>
		<p>3120 <i>D. teretifolium var. aureum 'Gigantor' HCC/AOC</i> x <i>D. Martin 'Royal'</i></p> <p>Similar to cross 3121. We have added 'Gigantor' to the mix with its massive blooms and an average of 9 flowers per inflorescence. We have also learnt that 'Gigantor' intensifies colour, with our cross <i>D. Hunter Legend</i>.</p> <p>Available in 50mm @ \$7</p>

		<p>JC1000 <i>D. striolatum</i> 'Alba Packer's' x 'Tassie Gold'</p> <p>This cross was made by Jody Cutajar. We have a few excess plants so thought we would make them available as everyone loves a good <i>D. striolatum</i>. These will be varying intensities of yellow, maybe a few albas.</p> <p>Available in 50mm @ \$7</p>
---	--	--

Tropicool™ Dendrobium Hybrids		
		<p>G52 <i>D. Bergen</i> 'Melissa' x <i>D. Zip</i> 'JMCM'</p> <p>We have been struggling to get germination with this spectacular <i>D. Bergen</i>, so I gave in and put the ever-fruitful <i>D. Zip</i> on to 'Melissa'. I guess this is seen as a stepping stone hybrid but the results should be some heavily patterned white flowers that are very strong growers. 3% bigibbum</p> <p>Available in 50mm @ \$7</p>
		<p>G73 <i>D. Jonathan's Glory</i> 'Dark Joy' HCC/AOC x <i>D. Zip</i> 'JMCM'</p> <p>There is no doubt we are looking for stripes and lots of them. There's nothing better than a compact plant that flowers its head off every spring and this is just what this cross will do. They may not be award winners but they will be colourful. 6.3% bigibbum</p> <p>Available in 50mm @\$7</p>
		<p>G66 <i>D. Touch of Class</i> 'Dark' x <i>D. King-Wong</i> 'Striker' AD/ANOS</p> <p>As Tropicool Dendrobium breeding become more complex, I believe it is crucial to reintroduce vigorous and easily grown hybrids or species. The late Norm Mitchell gifted me this piece of 'Striker' and I thought thing new mum would take a liking. I am hoping to see dark and large flowers on compact and vigorous plants. 6.3% bigibbum</p> <p>Available in 50mm @ \$7</p>
		<p>3141 <i>D. Gundy Sun</i> 'Shinning' x <i>D. Candice</i> 'Yellow/Purple'</p> <p>'Yellow/Purple' has achieved awesome things with the <i>D. Bergen</i> remakes. So, I decided to introduce it to the <i>D. Burgundy Cream</i> line. I guess this is somewhat a stepping stone cross. It may unlock potential or... it may not. A bit like every cross haha. Anyway, I have hopes of cream/yellow flowers with vibrant pink markings. 6.3% bigibbum</p> <p>Available in 50mm @ \$7</p>

Cool Dendrobium Hybrids		
		<p>2934 <i>D. Aussie Star</i> x <i>D. spec.</i> 'Herbmere's Moon'</p> <p><i>D. Aussie Star</i> is a colourful <i>D. kingianum</i> style flower. It's clear colour and vibrant spotting made it a perfect candidate to make some spots for spring! These plants will be strong growers and will be a mass of flowers once mature.</p> <p>Available in 50mm @ \$7</p>

Australian Dendrobium Species

		<p>3021 <i>D. spec.</i> ('Clarrie' x 'Larwind') x <i>D. spec. v. curv.</i> 'Yellow'</p> <p>These next three crosses were made by John Bennett and all use the same plant as Mum. 'Clarrie' x 'Larwind' was made by Woolf Orchid Culture and 'Larwind' is 'Mt Larcom Gold' x 'Windermere'.</p> <p>Available in 50mm @ \$7</p>
		<p>3022 <i>D. spec.</i> ('Clarrie' x 'Larwind') x <i>D. spec.</i> 'Triffid's Moon'</p> <p>'Triffid's Moon' is 'Triffid' x 'Daylight Moon' FCC/AOC, and boasts large rounded segments, awesome colour and texture plus. These will be compact growers and should be dark cream/light yellow in colour.</p> <p>Available in 50mm @ \$7</p>
		<p>3023 <i>D. spec.</i> ('Clarrie' x 'Larwind') x <i>D. spec.</i> 'Palm Moon'</p> <p>Dad here is a 'Palmerston' x 'Daylight Moon' FCC/AOC, this should produce creams and dark creams of excellent shape on long racemes.</p> <p>Available in 50mm @ \$7</p>

Australian Sarcanthine Hybrids

		<p>F104 <i>S. Magic</i> x <i>S. Nugget</i></p> <p>Again, this <i>S. Magic</i> is a perfect circle with the most vibrant of colours. <i>S. Nugget</i> is a new acquisition and shows the recent advances in orange <i>Sarc</i> breeding. The two together could give us some very interesting colour and a whole lot of shape.</p> <p>Available in 50mm @ \$6</p>
		<p>F108 <i>S. Melba</i> x <i>S. Donna Gaye</i></p> <p>Two of our very best whites. For me there's is something about a large, flat and pure white <i>Sarcochilus</i> that is so beautiful and timeless and as a judge always seems to stand out on the showbench. These should do just that, stand out.</p> <p>Available in 50mm @ \$6</p>
		<p>F126 <i>Plectochilus</i>. Harlequin 'Salmon' x <i>S.</i> (Yvette x Fitzhart)</p> <p>A cross I made purely for colour and lots of it! We have a beautiful <i>Plecto</i>. Harlequin 'Salmon' mericlone but it's an extremely slow grower. So, a fast growing and mottled pink/purple hybrid might do the trick!</p> <p>Available in 50mm @ \$6</p>

		<p>F182 S. Rosella x S. Burgundy on Ice 'White Eye'</p> <p>Searching for large flowers of watermelon and pink tones. The S. Rosella used is from the late Neville Ropers collection and 'White Eye' while not having the best shapes makes up in colour and size.</p> <p>Available in 50mm @ \$6</p>
		<p>JL157 S. Allana x S. Madge</p> <p>We are expecting lots of colourful pink tones, maybe a few yellow centres with excellent shape from this cross.</p> <p>Available in 50mm @ \$6</p>

Exotic Treasures

	<p>2932 <i>Cattleya tenebrosa</i></p> <p>These seedlings are from a flask given to us by Phil Spence. We expect them to be the brown form of this showy species that easy to grow.</p> <p>Available in 80mm @ \$10</p>
	<p>PR100 <i>Pleurothallis restrepioides</i> 'Dragonstone'</p> <p>Something a little different that will flower numerous times throughout the year with its long sprays of white and maroon flowers. We grow our specimens in very high light on the <i>D. speciosum</i> bench.</p> <p>Available in 80mm @ \$10</p>
	<p>2958 <i>Gomesa recurva</i></p> <p>Plants produce many inflorescences with an abundance of 2 cm large flowers. In full bloom this plant is a spectacular show plant. This easy to grow species will do well in most conditions with medium levels of light,</p> <p>Available in 50mm @ \$8</p>
